SELF STUDY REPORT FOR ACCREDITATION OF PROGRAMME
Ph.D. (Agricultural Engineering)
Dr NTR College of Agricultural Engineering, Bapatla

6.4.1 Brief History of the Degree Programme

Ph.D. (Agricultural Engineering) programme was initiated during the year 2012-13 in three Departments of Farm Machinery and Power Engineering, Processing and Food Engineering and Soil and Water Engineering. The Ph.D. students are supported by the university with a monthly stipend of Rs.10,000/-. ICAR's Broad Subject Matter Area (BSMA) specified syllabus is being followed for teaching Ph.D. (Agricultural Engineering) courses.

Historically, B.Tech. (Agricultural Engineering) undergraduate (UG) degree programme was started in August, 1983 with an intake of 20 students in the Department of Agricultural Engineering, Agricultural College, Bapatla. From the next year onwards, the seats were increased to 30. The UG programme was upgraded as the College of Agricultural Engineering (CAE), Bapatla in 1990 based on the recommendations of a high level committee appointed by the Government of Andhra Pradesh. It is the first college of agricultural engineering in Acharya N.G. Ranga Agricultural University. It was started with the **objective** of imparting knowledge and skills to the students in the disciplines of agricultural engineering education to serve the farming community and the rural people of the combined state of Andhra Pradesh and to make agriculture more remunerative to the farmers by bringing in the engineering interventions in agriculture. Till date, the college has **accomplished** one thousand four hundred and fifteen (1,415) number of students graduation from this institution. Many students have joined the premier national Institutes like IITs at Khargapur, Delhi, Roorkee, Chennai and Mumbai; IARI, New Delhi, NIFTEM, MANAGE, NITs at Jaipur, Raipur and other State Agricultural Universities for post-graduate studies.

The College was shifted to its new premises in May, 1994. Since then, the College expanded rapidly both academically and physically. Many infrastructural facilities were added in terms of buildings and equipment for improving the academic status in agricultural engineering. This college was accredited by Indian Council of

Agricultural Research, New Delhi during 1999-2000 in the first phase itself based on ICAR's Review Team Report and during the subsequent phases also. The latest accreditation of ICAR for this College was in 2019-2020. The College was under the faculty of Agriculture until 2010 when a new Faculty of Agricultural Engineering and Technology was established by the University as per the provisions of the University Act. The College was renamed as Dr N.T.R. College of Agricultural Engineering (Dr NTRCAE) in the year 2018 in memory of Late Dr N.T. Rama Rao the then Chief Minister of combined Andhra Pradesh and who was the person laid foundation stone for the College Building on 24-02-1988. Today, Dr NTRCAE is widely recognized for its quality education; need based research and transfer of technology in service of farming community.

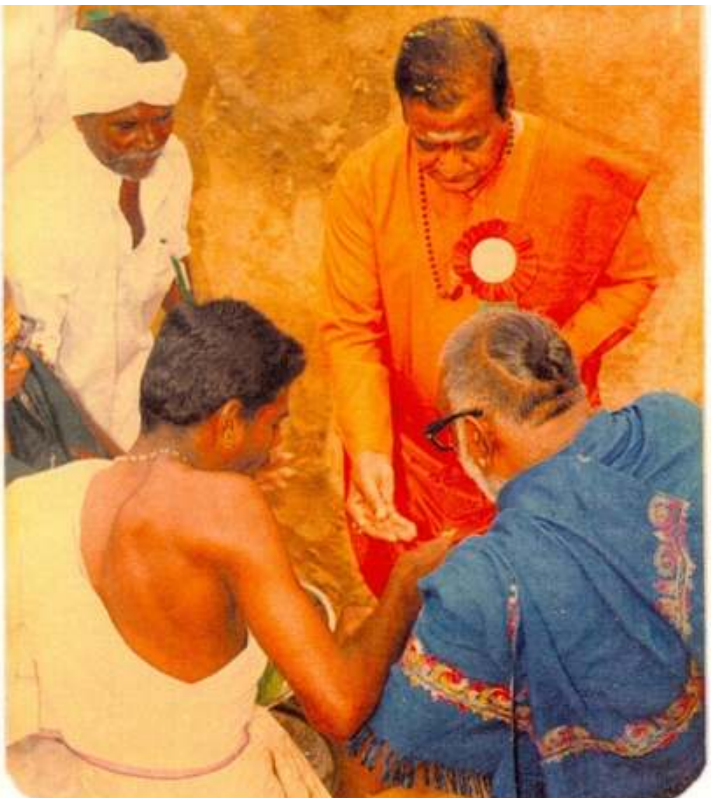

Fig 1. Dr. N.T. Rama Rao garu, Hon'ble Chief Minister of Andhra Pradesh laying the Foundation Stone of the College Building on 24-02-1988

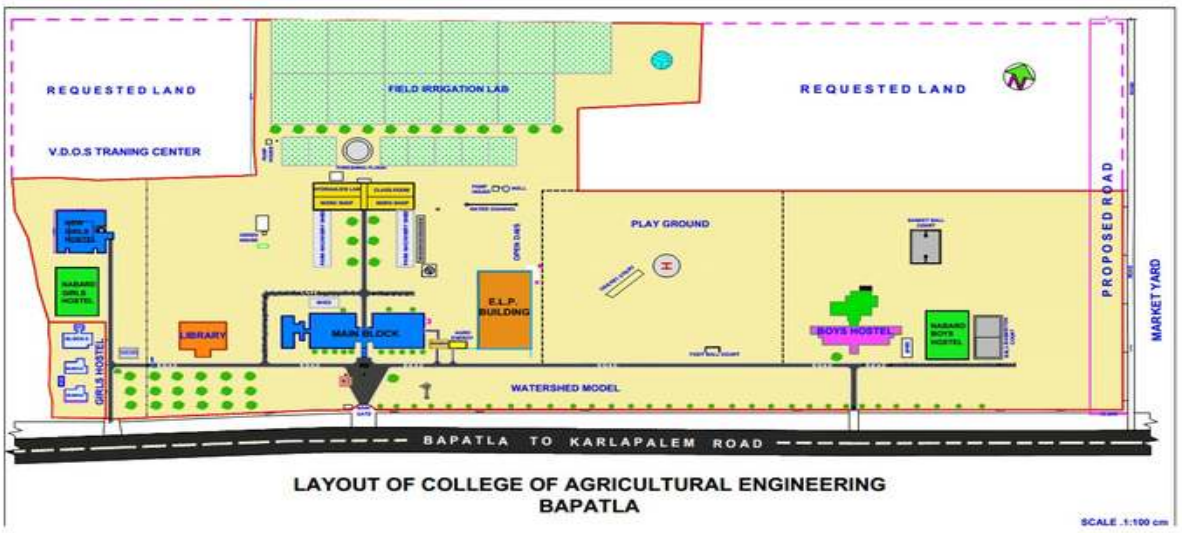

Fig 2. Layout of "College of Agricultural Engineering, Bapatla"

6.4.2 Faculty Strength

There are enough faculty members available to teach all the courses of B Tech (Agricultural Engineering) degree. College is having sanctioned strength of 31 faculty positions. Apart from 16 filled in posts of the College, there are 6 Teaching Associates working in the College. A Scientist of AICRP on Farm Implements Machinery Scheme and support from Agricultural College cater the needs of the UG and PG academic requirements. The College meets the number of faculty members recommended by the Indian Council of Agricultural Research, New Delhi.

Sanctioned and In-Position Faculty at Dr NTR CAE, Bapatla

S. No.	Position	Sanctioned Faculty	Faculty in Place	Vacant Positions	Faculty Recommended by ICAR

6.4.3 Technical and Supporting Staff

The College is having 10 sanctioned permanent positions as technical and supporting staff. Apart from this, there are 26 people working on Time scale/Outsourcing/Contract basis. The technical and supporting staff of 36 is sufficient to carry out the day to day activates of the college. The number of technical and supporting staff is much more than the number of positions recommended by the Indian Council of Agricultural Research, New Delhi.

Sanctioned and In-Position Office Staff at Dr NTRCAE, Bapatla

Sl. No.	Sanctioned Post / Category	Sanctioned Strength	In-Position	Vacant Positions	Office Staff Recommended by ICAR

6.4.4 Classrooms and Laboratories

There is a dedicated classroom with good lighting, ventilation and air conditioner for Ph.D (Agricultural Engineering) degree Processing and Food Engineering students. The classroom is equipped with LCD projector, chalk board, furniture, etc. The department is having different laboratories as detailed for conducting the laboratory classes and the students to conduct their research work.

Laboratories in the Department of Processing and Food Engineering of the college

1. Instrumentation Laboratory
2. Process Engineering Laboratory
3. Food Analysis Laboratory
4. Food Microbiology Laboratory
5. Environmental Control Laboratory
6. Extrusion Processing Laboratory

6.4.5 Conduct of Practical and Hands-on Training

Practical classes are conducted in respective laboratories as per class Time-Table with the instruments, equipment, machinery, etc. available. During Second Year First Semester, students are sent to ICAR research institutes (CRIDA, Hyderabad; CIAE, Bhopal; CIAE, Regional Centre, Coimbatore; CIPHET, Ludhiana and Abhor etc.), Central Government Organizations (Central Institute of Tool Design, Hyderabad; NRSC, Kolkata; SFMTTI, Garladinne etc.), State Government Organizations (APSAC, Vijayawada etc.) and also industries namely Bayer Science and Innovation Private Limited, and Corteva Agriscience (Seed Processing Division) for one month hands-on training.

6.4.6 Supervision of Students in Ph.D. Programmes

The advisory committee for each admitted student is allocated immediately to monitor the student's academic and thesis progress. All classrooms, laboratories, examination hall, all premises of the College, etc. are connected with CC surveillance cameras to monitor the teaching activities and student discipline continuously. Video of each camera is recorded in the system for sufficient duration.

To ensure uniformity and maintain academic standards of the for postgraduate and doctoral programs, the following guidelines are followed in the allotment of the Student Advisory Committee to take care of the PhD research Quality:

- PG students are allotted to faculty members based on seniority and their expertise. Faculty member seniority is the main criterion for allocation of Chairperson roles, considering the number of admitted students. Junior faculty members are appointed as committee members to gain experience under senior faculty.
- The Advisory Committee shall comprise two faculty members from the major field and one from the minor field and one from supportive department. Committee members should have adequate knowledge of the identified research problem to provide relevant guidance to the student.

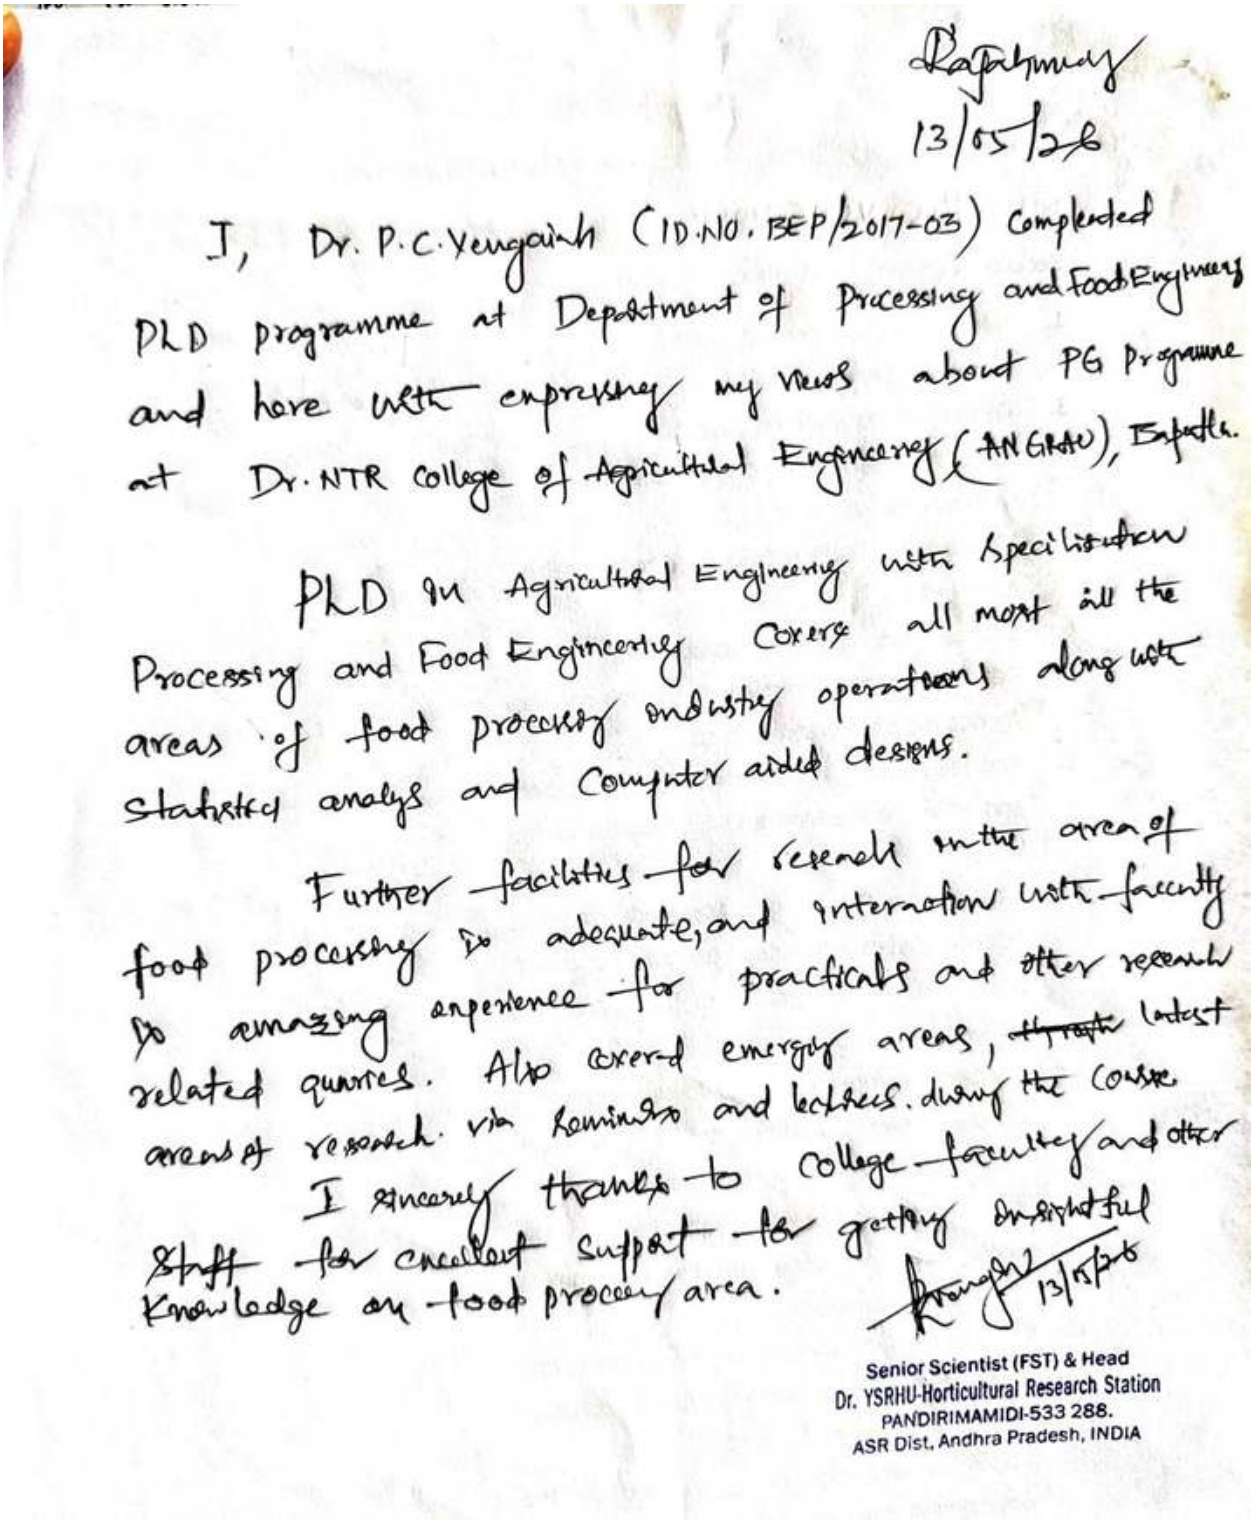

- A faculty member shall not serve as Chairperson/Co-Chairperson for more than five (5) students or as a committee member for more than ten (10) students at any given time for postgraduate and doctoral programs.
- While assigning Advisory Committees, ensure a balanced distribution of faculty expertise, including specialists in emerging or interdisciplinary areas relevant to the student's research focus.
- Chairpersons are responsible to convene Advisory Committee meetings at least twice per semester to assess and monitor the progress of the student's research and coursework. Detailed minutes of these meetings are documented and submitted as part of the student's progress report. These records are also made readily available during inspections by the Dean of Postgraduate Studies.
- We ensure that all committee members meet the qualifications prescribed relevant University guidelines, particularly for fields requiring specialized expertise.
- In the event of any disagreement regarding the allocation of Chairpersons or members, the issue is referred to the Head of the Department. The Head seeks the guidance from the University Head of the Department (UHoD) and consult with the Dean of Postgraduate Studies to ensure a fair and timely resolution.

The above guidelines are strictly followed in maintaining the quality and integrity of the PhD advisory process.

6.4.7 Feedback of Stakeholders (Students, Parents, Industries, Employers, Farmers, etc.)

Students are very happy with the conduct of the Ph.D. (Agricultural Engineering) programme in the department of Processing and Food Engineering, Dr. N.T.R. College of Agricultural Engineering, Bapatla.

Feedback of Ph.D. (Agril Engg) Passed Out Students

Rajahmundry
13/05/26

I, Dr. P.C. Yengaiah (ID.NO. BEP/2017-03) completed PhD programme at Department of Processing and Food Engineering and here with expressing my views about PG Programme at Dr. NTR College of Agricultural Engineering (ANGRAU), Bapatla.

PhD in Agricultural Engineering with Specialization Processing and Food Engineering covers all most all the areas of food processing industry operations along with statistical analysis and Computer aided designs.

Further facilities for research in the area of food processing to adequate, and interaction with faculty to amazing experience for practicals and other research related queries. Also cover-ed emerging areas, ~~thrust~~ latest areas of research via seminars and lectures during the course.

I sincerely thanks to college faculty and other staff for excellent support for getting insightful knowledge on food process area.

13/5/26

Senior Scientist (FST) & Head
Dr. YSRHU-Horticultural Research Station
PANDIRIMAMIDI-533 288.
ASR Dist, Andhra Pradesh, INDIA

I joined the PhD programme at Dr. NTR College of Agricultural Engineering and Technology, Bapatla in 2016 and completed my degree in 2022. My research was on Computer Vision based grading of fruits, guided by **Dr. D.D. Smith**, Professor, then Associate Dean of College of Food Science and Technology, Pulivendula Looking back, this programme has been one of the most defining experiences of my life.

The **teaching** at CAE was truly exceptional. **Dr. B.V.S. Prasad** had a way of making even complex engineering concepts feel approachable and meaningful. **Dr. C.R. Sukumaran**, though now retired, was one of those **rare teachers** whose classes you never wanted to miss — his experience and depth of knowledge left a lasting impression on all of us. And my guide, **Dr. D.D. Smith**, was more than just a research supervisor. He was **genuinely inspirational** always **patient**, always pushing me to think beyond the obvious, and believing in my work even when I had doubts. **The mentorship I received from him shaped not just my research but my overall outlook as a good researcher.**

The environment at CAE pushed me to explore Machine Learning and AI-related areas, which were not very mainstream in agricultural engineering at that time. Working on image processing, deep learning models, and computer vision as part of my research opened up a completely new world for me. The faculty never discouraged curiosity — in fact, they actively encouraged going beyond the syllabus.

The department under **Dr. B.V.S. Prasad** maintained a strong research culture, and **Dr. A. Mani** as Associate Dean ensured smooth academic and administrative functioning. The library, computational facilities, and lab infrastructure supported the research well.

Currently I am working as a Teaching Associate at Dr. NTR College of Food Science and Technology, Bapatla, and I use the ML and AI skills I developed here in my day-to-day work. The foundation built at CAE made that transition natural and confident.

I would suggest more hands-on workshops on emerging technologies and stronger industry connections for future research scholars. Overall, my time at CAE has been deeply rewarding, and I carry the lessons — academic and personal — with me every day.

Name: Dr. Y. Dileepsean
ID No.: BEP-16-003
Date: 14 May 2026
Place: Bapatla, Andhra Pradesh

I am G. Rajender (ID No. BEP-18-03), pursued my Ph.D. in the Department of Agricultural Processing and Food Engineering during the year 2023 at Dr. NTR College of Agricultural Engineering under Acharya N. G. Ranga Agricultural University.

I would like to express my feedback about the department of Agricultural Processing and Food Engineering. The department provides a very good academic and research environment for students. The laboratories, classrooms, and library facilities are satisfactory and helpful for both learning and research work. The department also gives importance to practical knowledge along with theoretical understanding, which helps students improve their technical skills.

The faculty members are supportive, experienced, and always encourage students in academics and research activities. They guide students patiently and motivate us to participate in seminars, workshops, and research discussions. The interaction between faculty and students is friendly and positive.

The teaching methodology followed by the department is effective and student-oriented. The combination of classroom teaching, practical sessions, presentations, and research activities helps students gain better understanding of the subject. The department also encourages innovative thinking and independent learning.

Overall, my experience in the department has been very good. I sincerely appreciate the efforts of the faculty and the department in maintaining quality education and research standards.

Name: G. Rajender Signature

I.D. NO: BEP-18-03

I am V. Navya, I am very proud to continue my academic journey by pursuing my Ph.D. in the Department of Processing and Food Engineering, at Dr. NTR college of Agricultural Engineering Bapatla in the year 2024. I feel very happy and grateful to continue my higher studies in this institution because of its excellent academic environment, supportive faculty, and improved research facilities.

The department provides strong acddemic and research support thraugh experienced faculty members, modern laboratory and adva-nced equipment facilities, practical learning, seminars, conferences webinars, workshops and industrial visits. The encouragement and guidance from the faculty members continuously help students impr-ove their and my technical knowledge, research skills and profess-ional development.

I am thankful to the department and college management for providing valuable opportunities and a positive learning atmo-sphere throughout my academic journey.

Yours Sincerely

V. Navya
Ph.D scholar
Dept PFE
BEP-2024-02

I submit to state that, I had completed my Ph. D (Agril. Engg) in Department of Farm Machinery and Power Engineering in Dr. NTR College of Agricultural Engineering, Bapatla in the year 2019. I would like to thank each and one who had supported me in completing my Ph. D programme. Professors in the Department of Farm Machinery and Power Engineering are well experienced in sharing the knowledge, motivate and supportive to the students in completion of research work and guide them in choosing the right path in their career. Department has well established laboratories (Workshop & Farm Machinery) and experienced technical staff to carry out the research work. Thank you for giving me the opportunity and it is really a great privilege to share my experience with the college and with my department.

Thanking you,

Yours faithfully,

8/9/2020

(D. Anil Kumar)

ASSISTANT PROFESSOR

College of Agricultural Engineering
Kandi-502285, Sangareddy Dist. T.S.
PJTS. Agricultural University

I, Madhubhree.M.N., PhD Scholar from the department of processing & food Engineering, Dr. NTR College of Agricultural Engineering, Bapatla am please to provide my feedback regarding the department.

The department provides a good academic & research environment with supportive faculty members & good Laboratory facilities. The theoretical & pratical classes are very useful for improving technical knowledge & research skills I highly recommend Students to join the M.Tech & PhD degree programmes offered by the department for Quality education & research exposure.

Madhubhree.M.N
BEP/2023-02.

6.4.8 Student Intake and Attrition in the Programme for Last Five Years

Admission to the Ph.D. programmes of college is based on the performance in entrance examination (SRF) conducted by the ICAR and followed by the interview. This is being followed since 2018-19. The reservation policy of the state government is also considered for finalization of the admission. Apart from regular admission, over and above, 15% of students secure admission under ICAR quota with ICAR fellowship. There is a provision of one seat for regular students in each Department and one seat

altogether for in-service faculty of ANGRAU of late, 61 students have enrolled to Ph.D. programme. The College has 6 doctoral students on roll during the academic year 2025-26.

6.4.9 ICT Application in Curricula Delivery

Yes, ICT tools are judiciously used for delivering the lecture contents and conducting of the practicals. The College is having smart classrooms, interactive board, audio visual facilities, etc. for teaching and for conducting seminars and review the progress of the students' research projects. Teachers are using these facilities regularly to deliver course lectures with power point presentations, and also to exhibit some models, and to demonstrate the simulations. Students are encouraged to deliver presentations through power point presentations.

6.4.10 SSR of the Ph.D. (Agricultural Engineering) Degree

Self study report of the Ph.D. (Agricultural Engineering) programme pertaining to the Department of Processing and Food Engineering of Dr N.T.R. College of Agricultural Engineering, Bapatla is here with submitted.

6.4.11 Certificate

I, the Associate Dean of the Dr. N.T.R. College of Agricultural Engineering, Bapatla, Andhra Pradesh hereby certify that the information contained in Sections 6.4.1 to 6.4.9 are furnished as per the records available in the college and degree awarding university.

Signature of the Associate Dean with Date and Seal
